**OVERVIEW**

The Camera Dolly 360 comprises of two solid aluminium sections, which can be taken apart with three practical handles; its three Shore polyurethane wheels have **ABEC 9** bearings for maximum smoothness are mounted on adjustable rotating clusters, which can be set against a handy . This way and quickly adjust the angle of each wheel cluster to create the perfect circular or linear tracking to suit your needs.

The Turntable kit is designed to turn the Dolly into an extremely handy 40-cm diameter turntable (for still life and for objects at 360°), with control over direction, speed, position, and deceleration.

CONTROLLER

The heart of the Motion Control! A device which combines electronics and long life storage batteries. The controller enhances the movements setting system for tracking shots, timelapse and manage the turntable, with a possibility to change speed, direction, rotation times, accelerations and slowing downs.

TURNTABLE

An important distinctive trait of ShooTools Dolly is that it can be easily **changed into a motorized rotary table**, with a 40 cm of diameter bearing plate, perfect for making 360° still life. In this setting too it is possible to decide both the rotation of the rotary plate and the stop motion move by using Controller One. The green cover cover provided allows to make shots with the "green screen" technique.

TimeLapse / HYPERLAPSE

The motion uses **SMS (Shoot Move Shoot) Technology** that allows to synchronize the track move with the Reflex shutter. This feature gives the possibility to use any exposure time, with no worry about blurry. The pause between a move and another can be set in a range from 1 second to 99 hours thanks to an **intervalometer integrated** into the controller.

TRACKING SHOT

Extremely precise and fluid tracking shots; opportunity to manage speed, direction, acceleration and slowing- down ramps.

STOP / MOTION

Easy Stop Motion mode: Give a new movement of camera at your Stop/Motion Videos

MACRO

Amazing Macro Tracking Shots with the lowest speed of 3,7 cm/sec

SETUP

Suitable for any type of photo or video head with 3/8" thread, or you can install the new Tilt Hi Hat ShooTools

HIGHLIGHTS

- 100% Made in Italy
- Motion Control Plus
- Turntable Included
- Over 66 lb payload
- Billet Anticorodal Components
- ABEC 9 bearings
- Professional Tool
- Two Sections Front / Back
- Cordura® Bags Included
- 5 YEAR WARRANTY

IN THE BOX

- Camera Dolly 360
- Motion Control Plus
- Controller Plus
- Motor 55
- Turntable
- Bag for Turntable
- Cordura® Bag
- Set-up Keys
- Instruction Manual

WARRANTY

5 YEAR WARRANTY

OVERVIEW

CHASSIS

Obtained from the high precision processing of a **single aluminium raw slab**, Camera Dolly is made of 2 sections extremely easy to set up tool-less. Light and portable, ShooTools dolly weight is only 7,7 lb (3,5 Kg) so it can be easily carried everywhere inside its Cordura® bag, included into the set. Both the peculiarities of the finest materials that compose ShooTools Dolly and the full processing to obtain it, made of ShooTools' dolly a truly valuable tool, **guaranteed for life** due to its sturdiness and its capability to support over 66 lb (30 Kg).

SPECIAL WHEELS

3 special polyurethane wheels, characterized by **ABEC 9** high precision steel ball bearing, offer extreme smooth tracking shoots and 360 videos. Each wheel assembly is adjustable and easy to manipulate accordingly to the needs of shooting. A detailed explicative table support and fasten the management of the wheels.

TECHNICAL SOLUTIONS

Dolly 360 is an absolute unique and complete device as it allows the realization of close ups, limitless tracking shots [due to the absence of the truck end,] and 360° shootings with a coverage **from 5 cm up to 4 mt**. Moreover, it is perfect for "in and out shots". As a matter of fact, the peculiar lightening obtained into the lower base of the chassis guarantees a perfect balance of the weight and, as a result, it offers an incomparable constancy of movement.

BRAKE

Totally practical and ergonomic. Dolly ShooTools distinguish itself for its brake: it is extremely useful to maintain easily the preferred position while shooting or even during a break or for a lens change.

SPECS

Length	15,7" (40 cm)
Width	15,7" (40 cm)
Weight	7,7 lb (3,5 kg)
Payload (Dolly)	66 lb (30 kg)
Payload (Dolly Motion)	44 lb (20 kg)
Payload (Turntable)	22 lb (10 kg)
Wheels	Three Shore polyurethane wheels
Ball Bearings	ABEC 9 bearings
Screw Thread	3/8"-16
Extera Holes	3 x 1/4"-20 3 x 3/8"-16
Materials	Anodized aluminium, steel ball bearing, polyurethane wheels
Treatments	Shot peening through ceramic spheres Organic Anodization at 30 micron
Battery Life	Over 48H in Timelapse and 22H in Video mode
Motor 55 Min Speed	1,45 inc/sec (3,7 cm/sec)
Motor 55 Max Speed	4,14 inc/sec (10,52 cm/sec)
Motor 55 (Dolly) Load	44 lb (20 kg)
Motor 55 (Turntable) Load	22 lb (10 kg)
