OVERVIEW

The Cordura® case is tear resistant and padded, with re-enforced sides and stitching. It comes equipped with double practical handles and an **adjustable shoulder strap**. A strong full-length XXL zip give you a sure and easy opening.

This way, all components are individually protected by the padding to prevent damage during transit. The special design also allows for the camera slider to be packed away with the video head attached, making packing quicker and easier. **Two internal pockets** allow to carry with you all the preferred accessories.
